55 Hermann St, Apt 32 | San Francisco, CA 94102 | (818) 634 – 2333 | akayvanfar@gmail.com | www.andrewkayvanfar.com | [LinkedIn](#) | [GitHub](#)

Portfolio

StreetEZ ([Live](#) | [Source](#))

May 2014

- Cloned the residential real estate website streateasy.com using Ruby on Rails, Javascript, and Backbone.js
- Implemented dynamically updating map using Mapbox Javascript API, solved fixed floating issue when user scrolls using custom CSS, added map re-centering when hovering over a listing to improve UX
- Solved constrained search using nested forms and custom chained SQL queries
- Created a polymorphic Notifications model to alert users to their interactions with the app and each other
- Integrated Twilio for text message confirmation upon signup

Asteroids.js ([Live](#) | [Source](#))

April 2014

- Recreated the classic arcade game Asteroids in browser with JavaScript and HTML5 Canvas
- Used trigonometric functions to calculate object velocities
- Implemented wrap-around to allow asteroids and the ship to move through the sides of the game map

Active Record Lite ([Source](#))

March 2014

- Cloned the basic ORM features of ActiveRecord with heavy use of metaprogramming
- Implemented mass-assignment, querying, and association methods

Technical Skills

- Ruby, Rails, Javascript, jQuery, Backbone.js, SQL, Git, HTML, CSS, Visual Basic

Work Experience
